SUPPLY CHAIN VALLEY

WHY JOIN SUPPLY CHAIN VALLEY?

Supply Chain Valley represents the logistics sector in the province of Limburg, East Brabant and the entire Limburg border area.

Within the Euregion, we focus on collaboration.

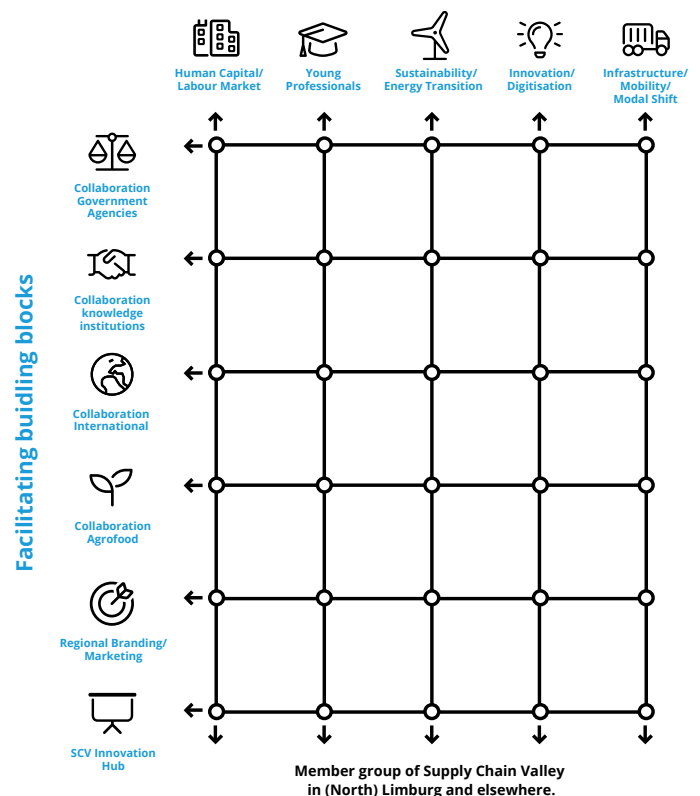

Members use the foundation's broad range of services. Membership is open to all companies and organisations for which logistics and supply chain management is important: small, medium-sized and large companies in logistics, agrofood, the manufacturing industry and healthcare logistics.

Supply Chain Valley supports members in focus areas that are strongly interconnected:

- **Human capital:** inflow, advancement and outflow.
- **Young Professionals:** students, graduates and starters within the business community.
- **Sustainability & Energy Transition:** CO2 reduction, electrically powered transport and hydrogen. Corporate social responsibility and sustainable entrepreneurship.
- **Innovation, Digitisation & Robotisation:** roadmaps for digitisation, innovation, optimisation and automation.
- **Infrastructure, Mobility & Modal Shift:** programmes surrounding rail freight transport, transport via inland ports, road transport, air freight, pipelines and information and communications technology infrastructure.

Substantive building blocks

Members work together in building blocks on all the above themes.

Sharing knowledge

Together with all Limburg knowledge institutions, we tailor the needs of the business community to the educational programmes. We conduct research and share all findings with our member population.

Innovation Hub

Everything comes together in the Innovation Hub of Supply Chain Valley. An inspiring place with room to work on projects, organise training and workshops, to network and to present and represent.

The organisation

Within our Quattro Helix, we as companies work together with government agencies educational institutions and the local area.

Information always flows in both directions and contributes to knowledge building that we then share. That is the beating heart of Supply Chain Valley.

A total of eleven building blocks provide direction and implementation to our strategy. Five of these building blocks are called the themed building blocks, i.e. the content.

The other six building blocks are facilitating. Collaboration is possible and desirable at every intersection in the matrix referred to previously.

JOINING SUPPLY CHAIN VALLEY

Companies, organisations and institutions

Membership is open to all companies, organisations and institutions for which logistics and supply chain management is important in Limburg, East Brabant and the 350-kilometre Limburg border area.

Both large and small companies in logistics, agrofood, the manufacturing industry and healthcare logistics. Including providers of logistics products, knowledge and skills. For example, tax, financial and legal advisors, supply chain consultants, estate agents, project developers, IT consultants, location selection consultants, banks, employment agencies and insurers are welcome to join.

Individual members and/or self-employed people

It is possible to join as an individual and/or as a self-employed person. Want to expand your network? Is your own development important to you and do you want to share your experiences with other logistics and supply chain professionals? In that case, a Supply Chain Valley membership is the right choice for you! Students enjoy a discount on individual membership.

MEMBER BENEFITS

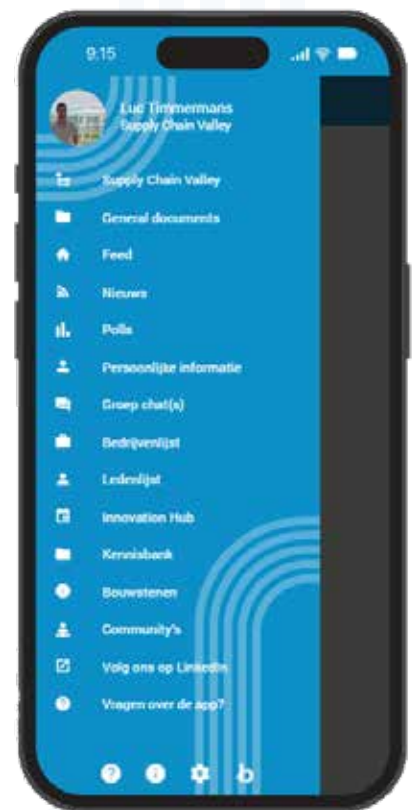

1. Access to a large logistics and supply chain network in Limburg, East Brabant and the Limburg Euregio border area.
2. The opportunity to stay informed of developments within the various sectors by visiting relevant conferences, seminars or workshops organised by SCV and through information made available by SCV via newsletter, website, the SCV app or otherwise.
3. Professionals you can contact with all your logistics and supply chain management questions.
4. Access to up-to-date promotional material.
5. Opportunities through the commercially interesting contacts established by SCV with domestic and foreign companies arising from the promotional efforts by SCV.
6. The opportunity to explore your opportunities abroad through international member trips organised by SCV.
7. An invitation to the General Membership Meeting at which we look back on and forward towards the activities of Supply Chain Valley.
8. Members gain access to knowledge via the knowledge base and can use the Supply Chain Valley app.
9. Members can participate in selected Supply Chain Valley events at a discount or sometimes even free of charge.
10. Members receive a discount when hiring the facilities in the Innovation Hub.
11. Members are given a platform via social media and during events in the Innovation Hub.
12. Supply Chain Valley maintains contact with government agencies, educational institutions and the local area on behalf of its entrepreneurs.
13. Members of Supply Chain Valley receive a discount on selected training courses, workshops and webinars in the Innovation Hub.
14. Members can collaborate on relevant themes within one of the eleven building blocks.
15. Members are entitled to participate in a Maturity Assessment, which we use as a starting document for creating a roadmap towards corporate social responsibility (staff management, sustainability, innovation, digitisation and automation).
16. Members can join one of our communities: logistics, agrofood, the manufacturing industry and healthcare logistics. As such, there are additional sector-specific programmes and benefits, which are also part of the Supply Chain Valley membership.
